

CONTRACTORS DUTIES AND RESPONSIBILITIES
REQUIRED FOR PIPELINE PERMITS
3/9/2021
(Revised 3/25/2021, 11/3/2022)

1. Submit heavy haul routes with map, after Beauregard Parish Police Jury approval video each route and mark routes with signage prior to any hauling and provide the video to the public works department. (Beauregard Parish Police Jury will patch as required prior to start.)
2. Monitor condition of roadway, shoulders, culverts, and ditches daily.
3. Monitor the approved heavy haul routes and report to the Road Manager any heavy loads not associated with permitted activities.
4. Report problem areas to the Beauregard Parish Police Jury weekly.
5. Repairs to include the following:
 - a. **Roadway shoulder and edge damage** - grade out areas along roadway edges where rutting and drop offs occur, patch damaged pavement edges, and place 6" thick dense gray limestone, roll and compact.
 - b. **Failures in roadway**
 - i. Remove all loose debris and pieces utilizing a sweeper.
 - ii. Furnish place and compact dense gray limestone, shape to roadway surface.
 - iii. Inspect daily and maintain these areas throughout hauling, add dense gray limestone and reshape as required.
 - iv. After completion of hauling activities, excavate a minimum of 6" deep, remove material, trim edges to provide straight lines, furnish, place and compact 3" of dense gray limestone and fill remainder with (approximately 3" thick) hot mix asphalt with sufficient rolling to match roadway surface.
 - c. **Culvert Damage**
 - i. Provide temporary matting, pipe extensions or other methods to prevent culvert damage due to wide turns.
 - ii. Damaged culverts to be opened, extended, or replaced to return to original condition and provide proper drainage.
 - iii. Excavate any ditches where drainage flow is disturbed.

Note:

Beauregard Parish Police Jury must inspect and approve all repairs prior to final acceptance.
